PROFESSIONAL SUMMARY

Software Developer with around 4 years of experience designing and building scalable backend systems and full-stack web applications using Python, Django, FastAPI, and React.js. Skilled in REST API and microservices development, AWS cloud deployment, and real-time systems using WebSockets and Celery. Proven track record delivering production-grade features in Agile/Scrum teams, partnering with product and design stakeholders.

EDUCATION

B. Tech - Matoshri Pratishthan's School of Engineering

2022

CGPA: 9.05/10 (First Class with Distinction)

PROFESSIONAL EXPERIENCE

UrbanMatch Tech Pvt Ltd, Software Developer

11/2023 – Present | Remote

- Designed and developed scalable backend systems using Python, Django, and Django REST Framework (DRF), building RESTful APIs supporting 50K+ active users with 99.9% uptime.
- Architected microservices-based solutions and deployed containerized applications using Docker, Kubernetes, and AWS (EC2, ECS, Lambda, RDS, S3), reducing deployment time by 35%.
- Developed real-time notification and messaging features using WebSockets; integrated Razorpay (payments), Firebase, and OneSignal, increasing user engagement by 20%.
- Built asynchronous processing pipelines using Celery and RabbitMQ, handling 10K+ background jobs per day for event-driven workflows.
- Optimized database queries using Django ORM and Redis caching, reducing average API response time by 40%.
- Developed responsive React.js frontend modules with Redux/Context API state management, reducing page load time by 25% through code splitting and lazy loading.
- Integrated React frontend with backend REST APIs, improving data flow and overall application performance across key user-facing modules.
- Wrote unit and integration tests for backend APIs and frontend modules, maintaining 85%+ code coverage and ensuring production stability.

G+D MS India Pvt Ltd, Junior Software Engineer

09/2022 – 11/2023 | Pune

- Built and maintained RESTful APIs using Python, Django, Flask, and DRF for enterprise mobile applications serving 100K+ end users across Android and iOS platforms.
- Designed and optimized PostgreSQL and MySQL database schemas, improving query performance by 30% and reducing data retrieval latency.
- Implemented Firebase push notifications and event tracking, improving real-time user engagement rates by 18%.
- Architected JWT and OAuth-based authentication with role-based access control (RBAC), securing API access across 5+ distributed microservices.
- Built core platform modules — onboarding, matchmaking, subscriptions, and account management — reducing backend error rates by 22% through rigorous testing and code review.
- Streamlined CI/CD pipelines using GitHub Actions, cutting average release cycle from 3 days to under 8 hours.
- Built internal tooling and lightweight services using Node.js/Express.js and TypeScript, and prototyped a MongoDB-backed data store for a non-relational workload.

SKILLS

Languages: Python, JavaScript, TypeScript

Frontend: React.js, Redux, Context API, HTML5, CSS3

Backend: Django, FastAPI, Flask, Node.js, Express.js, REST APIs, Microservices Architecture

Databases: PostgreSQL, MySQL, MongoDB, Redis

Real-Time: WebSockets, Celery, RabbitMQ, Event-Driven Architecture, Webhooks

Tools: Git, GitHub, Postman, Jira, Confluence, Agile/Scrum

Auth & Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC)

Cloud & DevOps: AWS (EC2, ECS, Lambda, RDS, S3), Docker, Kubernetes, CI/CD, GitHub Actions
