PROFILE

Highly skilled Full Stack Developer with 3.6+ years of experience building scalable and high-performance web applications using Python (Django, FastAPI) and React.js. Strong expertise in Django REST Framework (DRF), REST API development, database design, and microservices architecture. Experienced in developing responsive frontend applications, integrating backend APIs, optimizing database queries, and deploying cloud-native production systems on AWS using Docker and CI/CD pipelines. Proficient in building real-time systems using WebSockets and delivering scalable, user-centric applications in Agile development environments.

EDUCATION

B. Tech - Matoshri Pratishthan's School of Engineering

2022

CGPA: 9.05/10 (First Class with Distinction)

PROFESSIONAL EXPERIENCE

UrbanMatch Tech Pvt Ltd, Software Developer

11/2023 – Present | Remote

- Designed and developed scalable backend systems using Python, Django, and Django REST Framework (DRF), building high-performance RESTful APIs supporting 50K+ users.
- Architected microservices-based solutions and deployed containerized applications using Docker and AWS (EC2, ECS, Lambda, RDS, S3), improving scalability and deployment efficiency.
- Developed real-time features using WebSockets and integrated third-party services like Razorpay (payments), Firebase, and OneSignal (notifications).
- Built asynchronous processing pipelines using Celery and RabbitMQ for background jobs and event-driven workflows.
- Optimized database performance using Django ORM, reducing API response time by 40%.
- Developed responsive frontend interfaces using React.js, JavaScript, and reusable component-based architecture for user-facing platform modules.
- Integrated React frontend applications with backend REST APIs, improving data flow, usability, and overall application performance.
- Wrote unit and integration tests for backend APIs and frontend modules to ensure application reliability.
- Implemented state management using Redux/Context API and optimized frontend rendering performance for scalable web applications.

G+D MS India Pvt Ltd, Junior Software Engineer

09/2022 – 11/2023 | Pune

- Developed backend APIs and microservices using Python, Django, and DRF for large-scale mobile and enterprise applications.
- Designed and optimized database schemas using MySQL and PostgreSQL, improving performance and data integrity.
- Built RESTful APIs for Android and iOS integration, ensuring reliable and scalable communication.
- Implemented Firebase-based push notifications and event tracking for real-time user engagement.
- Performed debugging, testing, and CI/CD-based deployments, ensuring stable and maintainable releases.
- Built and maintained APIs for core modules including onboarding, matchmaking, subscriptions, and account management, ensuring secure and efficient system design.
- Implemented authentication and authorization using JWT and OAuth with role-based access control (RBAC) across distributed services.

SKILLS

Languages: Python, JavaScript, TypeScript

Frontend: React.js, Redux, Context API, HTML5, CSS3

Backend & Frameworks: Django, FastAPI, Flask, Node.js, Express.js, REST APIs, Microservices Architecture

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, ECS, Lambda, RDS, S3), Docker, Kubernetes, CI/CD, GitHub Actions

Messaging & Real-Time Systems: WebSockets, Celery, RabbitMQ, Event-Driven Systems, Webhooks

Authentication & Security: JWT, OAuth, Role-Based Access Control

Tools: Git, GitHub, Bitbucket, Postman, Hoppscotch, Jira, Confluence, Agile/Scrum
